

State of Michigan

New Madrid Aftermath Tabletop &
Functional Exercise

Objectives

- Evaluate the ability to repair services: oil, natural gas, electricity, telecommunications, water supply
- Test the ability to mobilize resources internally and externally through the SEOC to affected areas, and via EMAC to other states
- Test communications internally and externally, and via the JIC to the media and public
- Test the ability to provide mass care: shelter, food, first aid, etc.

Separation from the NLE

- MSP planners wanted to test more capabilities than were being envisioned with FEMA
- MSP felt that the NLE focus was on directly affected states – wanted to use the opportunity test capabilities beyond EMAC

Players

- SEOC: MSP, MDOT, MDCH, MDEQ, DELEG, DTMB, Red Cross, AG, Treasury...
- DCH's ECC
- DELEG's ECC
- MSP troops
- MSP JIC

Scenario

- 3:00am on February 22, 2011
- New Madrid and Wabash Valley Seismic zones rupture, 8.1 and 6.6m respectively
- Loss of: power, natural gas, oil, coms.
- 18 county blackout
- Shut down: schools, government, businesses, transportation
- Impacts to refineries, gas pipelines

Injects

- From: SimCell, lead controller, Red Cross, Logistics Group Chief, State Director, JIC, MSP
- Total Injects: 83

Examples of Injects

- FEMA requests supporting states take 5,000 survivors each
- Requests from directly affected states for package resources, search and rescue teams
- Request from State Director on number of public water supplies impacted by blackout
- Illinois needs assistance housing prisoners

Yet to Come

- After Action review
- Corrective Action Plan
- Revisions to Departmental and Divisional plans
